PA House to Vote to Extend Workers' Compensation 90 Day Rule

On May 23 the PA House of Representatives will vote on HB 808, which extends the time period for captive treatment with a panel doctor from 90 days to 180 days (6 months). This is the insurance companies' version of rationed medical care. This is not just a bad bill, it is **bad** medicine. It will deprive injured worker's the right to select their own medical provider and limit access to quality medical care.

Call to Action

Please contact the legislators listed below and **ask them to vote NO to HB 808.**

Your effort today, along with that of your family and friends, can help turn senators against this piece of legislation.

THANK YOU!
